FOCUSED HYGIENE BELTING SOLUTIONS

Our high-quality repairs and replacements are offered at competitive prices, giving you peace of mind without sacrificing quality. Plus, all belts supplied are fully certified and come with the necessary documentation to meet your compliance standards.

Chemical Friendly

Looking for a cleaner, safer belt for your production line? Our chemical-free conveyor belts are made without harsh additives, plasticizers, or dyes—just pure, food-safe performance you can trust.

Why Choose It?

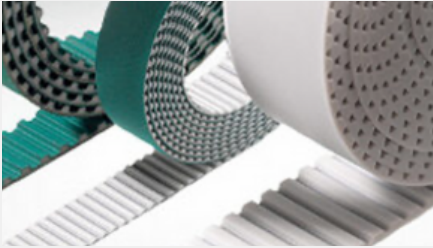

- No toxins, no worries
- Perfect for organic, allergen-free, or sensitive product handling
- Meets FDA and EU food contact standards
- Won't leach, discolor, or contaminate your product
- Durable, easy to clean, and built to last

Ideal for food, pharma, or any clean manufacturing environment that values purity and sustainability.

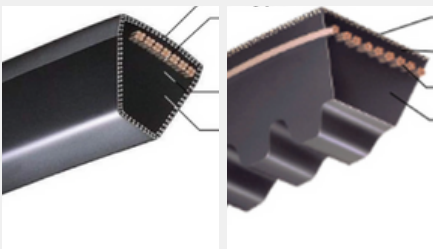

PRODUCTS

Popular Sellers

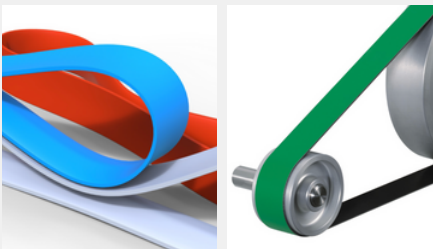

Timing Belts

Our Timing Belts are engineered for high-precision synchronous conveying, ensuring consistent and accurate product movement. Designed with high-tensile strength and precision-molded teeth, they offer excellent load-carrying capacity, reduced slippage, and exceptional durability.

V Belts

Our V Belts are designed for efficient power transmission across a variety of industrial and mechanical systems. With their trapezoidal cross-section, V Belts offer high friction and excellent grip, reducing slippage and maximizing energy transfer between pulleys.

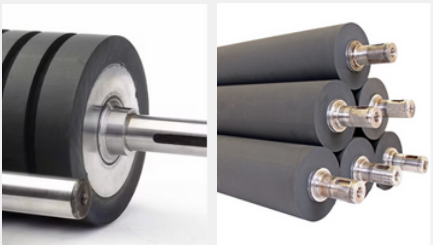

Power Transmission Belts

Our Power Transmission Belts are engineered for reliable, high-efficiency power transfer across a wide range of mechanical and industrial systems. Designed to handle varying torque loads and operating conditions, these belts ensure quiet, smooth, and slip-free performance.

Machine Tapes

Our Machine Tapes are made to keep your equipment running fast and friction-free. Whether you're folding cartons, sealing packages, or moving light products down the line, these tapes deliver grip, accuracy, and long-lasting performance.

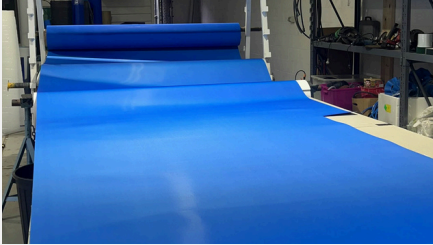

Roller Coating Services

Keep your production running smoothly with our roller coating and recoating services. Whether you're restoring worn rollers or upgrading to a more suitable surface, we apply high-performance coatings that improve grip, durability, and product handling.

PRODUCTS

Popular Company Belt Types

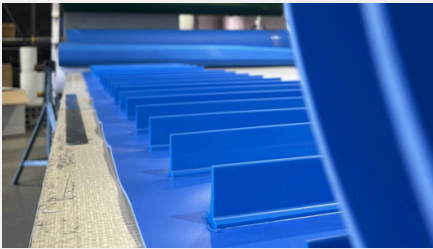

Process Belt Conveyors

Simple, smooth, and food-safe—perfect for moving packaged goods or raw ingredients with minimal contamination risk. Easy to clean and ideal for general food processing.

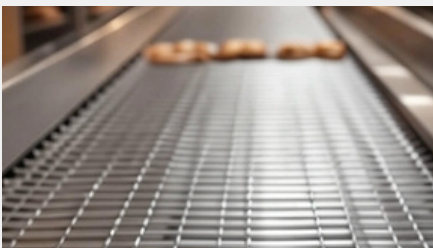

Modular Plastic Belt Conveyors

Engineered for hygiene and durability, these interlocking plastic belts are perfect for wet, messy, or high-washdown environments such as seafood, produce, and meat processing. We also supply heat-resistant modular belts for enhanced performance in high-temperature applications.

Cleated Belt Conveyors

Need to move loose or bulk food uphill? Cleats keep everything in place—ideal for grains, snacks, chopped vegetables, and more.

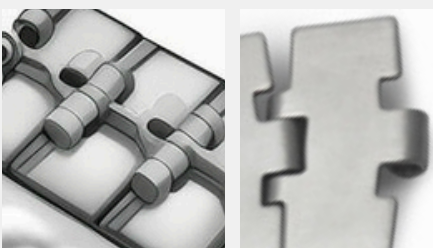

Wire Mesh Belt Conveyors

Great for baking, frying, or cooling. Stainless steel mesh allows for airflow and heat transfer—ideal for hot or sticky food items.

Plastic Chain Belts

Our plastic chain belts are designed for smooth, quiet operation — perfect for food, beverage, and packaging lines. No custom fabrication — simply choose the size and model that fits your line, and it's ready to go!

Steel Chain Belts

Our stainless steel belts offer unmatched reliability, corrosion resistance, and long service life. Whether you're in food processing or manufacturing it's the conveyor solution that works as hard as you do. Pre-engineered, fully assembled, and ready for immediate installation.

PRODUCTS

Products suited for your business

Incline/Decline Belt Conveyors

Move products between levels without compromising flow or cleanliness. Perfect for feeding packaging machines or transporting product through multiple processing stages.

Roller Conveyors

We supply, replace, and install Roller Conveyors. Need a simple way to move boxes, bins, or products from A to B? Our roller conveyors are a no-fuss, super efficient solution for all kinds of workplaces – warehouses and packing stations to food production lines.

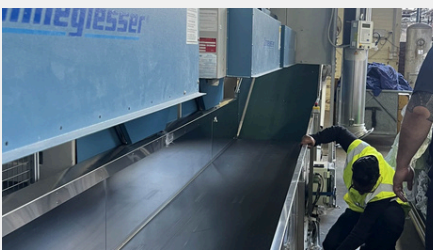

Solutions for Warehousing & Logistics

Boost efficiency across your warehouse or distribution center with durable, low-maintenance conveyors designed for fast, reliable product flow. Ideal for sorting, packing, and dispatch areas, our solutions include flat belts, modular systems and roller conveyor designs.

Solutions for Airport Operations

Durable, low-maintenance belts designed for fast, reliable baggage handling. We supply belts for all airport systems—flat, curved, and inclined—and offer full servicing to keep your machines running smoothly.

Solutions for Laundry Operations

Conveyor solutions for commercial laundries, our belts make sorting, folding, and transport faster and more efficient. Built to handle high volumes of linens, garments, and towels, they're easy to clean, gentle on fabrics, and built for long-lasting performance in hot, humid environments.
